LABOR & PARTS

J# 1 06FTZ-MISC1 ENGINE MISC TECH(S):80022 375.00
CUSTOMER STATES THEY BELIEVE THE HEAD GASKET IS BLOWN. CHECK AND ADVISE.
Verified concern. Strong odor of coolant coming from exhaust while engine running. Scanned for DTCs- Multiple present: P0301, P0316, P1299. Performed Power Balance- Cylinders 1, 3, 4 intermittent low relative power balance. Performed Relative Compression-OK. Inspected coolant system- Degas bottle low, now evidence of external leaks. Performed coolant pressure test. Coolant dropped 5 psi per 30 minutes. Removed spark plugs- Found excessive coolant intrusion in cylinder 1, as well as severe scoring and heat spots on all 4 cylinders walls. Due to overtemp of cylinder head from severe coolant intrusion, damage to the cylinder head and cylinder walls of engine block requires replacement of long block.
CUSTOMER TOWING VEHICLE OUT OF SHOP.
